

American Refugees

We hear a lot of talk about "Jewish refugees" from the Soviet Union. Years ago, it was refugees from Hitler's Germany. The U.S.A. once had a great reputation as a haven for those trying to escape oppression or persecution.

Recently a Gallup Poll indicated that 24,000,000 Americans now want to leave the United States for good. One American in eight has "HAD IT." All they want is OUT. It is easy for one person to leave the country. All he has to do is to buy a ticket to some other place; it is not so easy for 24,000,000 to leave all at once. This would be a mass migration. Most countries already have a surplus of citizens and an unemployment problem. It is not easy to go to a foreign place and find a way to make a living.

Why do Americans want to leave the country?

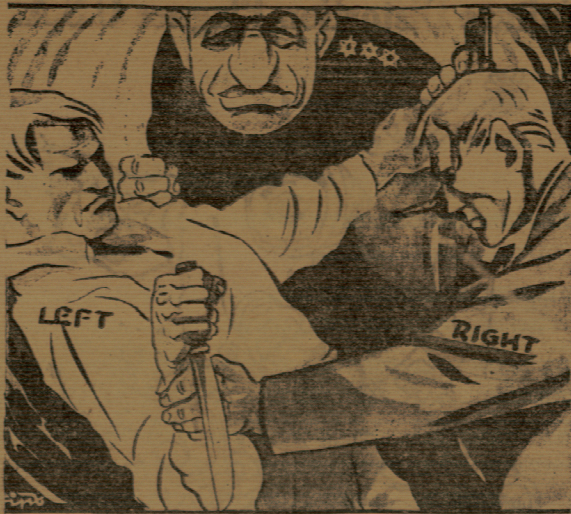

Under Zionist rule, the U.S.A. is no longer a desirable place to live. Crime is up and the economy is down. We live under a technological tyranny. Elections are a farce used to manipulate public opinion. We are engaged endlessly in futile no-win wars which devour the lives of our children. Dope addiction is promoted by greedy politicians and corrupt police. The cultural life of the country is utterly degraded. Churches are empty shells, the mere tools of the money power. Beyond that, the "Great Patriots" and "Great anti-Communists" who promise to "save" us are all empty-headed frauds of the worst and lowest kind. They have been lying about Communism for a hundred years, and they have never really lifted an effective finger against it. Each braying jackass makes up a myth which pleases him and demands arrogantly that everybody pretend to believe it. Their "crusades" are always worthless emotional binges. Their activities never take the form of an organized will-to-power, because they have no real intention of flinging a serious challenge into the face of the rotten **Establishment** which rules over us.

The ungodly humbugs and bores who dominate the "Patriotic" movements today will not save the country. They will not even discuss anything real. They retreat more and more deeply into their fantasy-lands. They fiddle while Rome burns. They are incorrigible nit-pickers, slogan-howlers, myth-makers, and beautiful dreamers. Effective political leaders, they are not.

There is no patriotic leadership which is worth anything. Communism will die of old age long before the American anti-Communists ever do it any harm. One American in eight already has decided that the time has come to get out while the getting is good. These are the smartest people in the country.

One might suppose that those who wish to flee are all white middle class people, fed up with forced race mixing and all that. Just the other day, I was in the drug store in the Port Authority Bus Terminal in New York, drinking a cup of coffee while I awaited a bus to Union. A Negro sitting on the next stool turned to me and said, "I sure wish I could get out of this country. The U.S.A. is not a good place to live any more." Racial minority dynamism may be a great force in politics, but it has not convinced the average Negro that it will ever better his lot. Many of them would like to go to Africa; but this too is easier said than done. Many African countries also suffer from overpopulation and unemployment. "Going back to Africa" is mostly a pipe dream. One Negro may be able to do it; if 50,000 should try it, the immigration bars would go up in a hurry.

Many whites fancy Australia as a place to go. Australia is indeed a fine country. The people are brave in war and have a delightful way of living in peacetime. So many Americans already have gone there that they have touched off a major land boom. Still, Australia's ability to absorb a mass immigration is problematic. The economy may suffer from the entry of

Britain into the Common Market. There may not be enough capital to spark industrial activity to employ a greatly increased population. Australia can absorb a certain number of immigrants; but how many?

There is one especially good reason for wanting to leave the U.S.A. Because of the total idiocy, the utter imbecility, the bottomless, disastrous, ignorant, corrupt conduct of our ruling class, we are going to destruction. Unilateral disarmament is inevitably fatal. We will not "go Communist." We will be blown off of the map. The Americans will become simply the people who used to live here. If any kind of people inhabit North America in the 21st Century, they will be people of a different race, speaking a different language.

When will the extermination of the people happen? General Curtis LeMay says that an ultimatum will come from Russia within 18 months. Francis Parker Yockey said years ago that World War III might come at any time within a 15-year period, beginning in 1960 and ending in 1975. Others say that the U.S.S.R. will attack around 1980. Let us not blame the U.S.S.R. If I were a Russian, and saw the pack of you carrying on the way you are carrying on now, I too would blow you over the moon and get rid of you and take your land. If you allow yourselves to be ruled by such a pack of scum as rule over you now, you richly and fully deserve it.

It is indeed the only possible thing which can be done with you. You have no real patriotism left in you. You run in your sheeplike herds after every silly quack who flatters your undisciplined desires, who insulates your mind from every kind of historical reality, who tickles your silly class hatreds and class vanities, who lies to you long enough and loud enough to convince you that he can lead you to a thumping victory over "Communism" by howling worthless and stupid slogans.

No nation has ever survived such a hopelessly corrupt ruling class as the U.S.A. has today. They have supported Communism secretly; openly, they have howled against "godless, atheistic Communism" and have used it as a club to batter everybody into conformity.

There is not really much left for the intelligent individual to do except to get out while the getting is good. This is not the easiest thing in the world to do. Can you make a living in a foreign country? Perhaps you could. But can 24,000,000 do it?

We have heard a lot of propaganda about "homeless Jews."

Where can 24,000,000 homeless Americans go? It is now painfully clear that any constructive ordering of world affairs now lies on the far side of a great disaster, which is absolutely unavoidable. Matters have already gone too far. The country is not going to be saved. The most discouraging thing of all is the footling and shiftless activities carried on by those who have the consummate gall to advertise themselves as our "saviours." It is when we contemplate the self-styled "great patriots" and especially the professional "anti-Communists" that we become most discouraged. They only want us to run around in circles until we drop from exhaustion.

The long and short of it is that both the right wing and left wing support the **SAME** system, the **SAME** rulers. This system and these rulers are sufficiently evil and cor-

rupt to insure our demise as a nation. We are fed up with the lies of those who say that they are "fighting Communism," when in fact they are supporting the very people who financed the October Revolution in Russia, who put Mao into power in China. There is a sophisticated propaganda gimmick, invented by Jewish intellectuals; they have fooled the West for a hundred years! Now they have destroyed Western civilization. How can we escape from the shambles of ruin which they have brought upon us?

It will be hard to escape. Safety is a hard thing to find in today's world. It is certainly not to be found in the United States, which is one of the main reasons why 24,000,000 of our best and smartest people now want to leave the country!

Who Is Destroying America?

(Continued from Page 2, Column 3)

not we will be here at all. Only one thing would keep us here: **MILITARY POWER**. The braying asses of professional "Patriotism" are saviours who cannot save. They spend their time of day locking under beds to try to find "Radicals." They howl for the return of the good old XIX Century. They do not know the difference between expedient myth-making and reality. There is nothing to be found in "Conservatism" or in organized professional "Patriotism" or in "Anti-Communism" which will do us the slightest good. In order to survive, we would have to do what the U.S.S.R. has done. We would have to become a **MILITARY POWER** nation instead of a **MONEY POWER** nation. It would be no good merely to "Rearm." **MILITARY POWER, TO FUNCTION SUCCESSFULLY TODAY, MUST CEASE TO BE THE SERVANT OF THE MONEY POWER.** In Russia, Marshal Grechko does not have to argue with civilians; he can simply **TELL** them. In the U.S.A., the military are bound to obey even such specimens as McNamara and Yar-molinsky. God help us! After the ungodly, years-long mess they made in Vietnam, how can we believe that they can fight any first class power? The real meaning of the Vietnam debacle is that the **MONEY POWER** no longer knows what to do with Military Power.

When I contemplate the silly pack of asses, of both the Right and Left Wings, who pose as our "Saviours" today, I am all but ready to flee the country. Their only real function is to destroy the American political intelligence, so that political intelligence among the people will not hamper the Money Power. The next time someone tells you that he is "Fighting Communism," ask him how many atomic bombs **HE** has. There is only one kind of power in the world today: **MILITARY POWER**. Anything else is worthless. The foolish pseudo-controversies which rage across the American landscape are not only worthless; they are pernicious. Only recently a prominent patriot tried to tell me that people like Hargis, McIntyre, and Welch should be supported, because "They are doing a little good." They are not doing "A little good." **THEY ARE DOING INFINITE HARM.** They are leading the American people to defeat and extinction. If the American people really want to go to hell in a cart, perhaps they should be allowed to go; but the destination should be clearly marked on the road signs. Military Power, and Military Power in the service of the nation rather than in the mere service of the Money Power, would provide the only possible hope of survival. If this hope is not to be realized, and there are many indications that it will not be realized, then we have come to the end of the history of the American Republic, whose last function will be to make a wonderful, total bonfire.

Culture is a detachment of the heart from the gross pleasures of sense and an appreciation of material, intellectual and ascetic excellence together with a love of moral and spiritual perfection.
